But wait, there's more!

For my next trick, I need a length over score nucleotide sequence search on nucleotides 501 through 926 of SEQ ID NO:3 in the above entitled case. I need the lower and upper limits to be 8 and 50, respectively, I need any hits that is above 65% complementary, and please transfer as many hits into the excel program as possible. No need to search the interference databases in this one.

Thanks,

Doug Schultz
